

“If you look at a tooth prepared with the ProDrive versus a friction grip, I think what you’ll find is you have a smoother preparation, it’s easier to cut and you have the ability to lengthen burs where needed.”

Sameer Puri, DDS

## GET YOUR BEST CEREC® PREP WITH PRODRIVE

*“With ProDrive you can do: veneers, inlays, onlays, full coverage crowns. Basically, anything that can be done previously, you can just now do easier, faster and more precise.”*

Sameer Puri, DDS

**3mm of safe bur extension**

Improved precision and accessibility in difficult to reach areas.

### ProDrive, the Logical Evolution in Dentistry.

Unlike traditional friction grip design, ProDrive’s revolutionary upgrade turbine and triangular bur system lock together for noticeably improved cut performance, superior control and improved precision.

You can experience ProDrive two ways, the ProDrive Upgrade Turbine for leading brand handpieces, or the ProDrive High-Speed Handpiece (standard or mini head). Both options work with the triangular shank ProDrive Bur which is specifically designed to engage with ProDrive Upgrade Turbines and ProDrive High-Speed Handpieces.
